

# Water Education for the Realtor & Consumer

## Water Quality

- **PFAS**

Chemicals in the water supply

This is an environmental issue around the country.

What is your state or local community doing?

[FACT SHEET \(epa.gov\)](#)

[PFAS - American Water Works Association \(awwa.org\)](#)

[Per- and Polyfluoroalkyl Substances \(PFAS\) | US EPA](#)

- **Potable Water**

Potable water may not be potable

Testing needs to be at least once a year.

- What your Residential Customer should know about their drinking water.
- What your Developer & or Commercial customer should know about the drinking water that will serve their site.
- Look to your local & state environmental department, local health departments and your universities for assistance.

- **National Test Sites for Water**

[Comprehensive Testing & Certification | Eurofins E&E North America \(metlabs.com\)](#)

Eurofins

[Test America - Inside the Mind of the Consumer \(crgtestamerica.com\)](#) Test America

[Drinking Water – Pace Analytical \(pacelabs.com\)](#) Pace Laboratories

- **Septic Systems and Water**

If your water is public or community, who tests it? Check with your water company.

For your septic, is it a Special Filtration Systems or a Standard Systems? What are

your state or local regulations for inspections? Do your research.

- **WOTUS Waters of the US**

Ground Water, Aquifers, Navigable, & Flash Flooding
