

Minnesota Association of REALTORS®

The MN Leadership team has been working on the grassroots efforts of the MLS discussion. We started the conversation as leadership to leadership meetings with all leaders and no staff from across the state. We heard our members and they were concerned about MLS. The concern they all had is the need to belong to multiple MLS'S in order to represent their clients and do their business. This has many issues such as the cost, the need for multiple administrative duties, making several inaccuracies and inefficiencies.

We have traveled the state to meet with all local associations, visited the T3 Summit and have now had approved from our state BOD funds to hire a third party consultant and take the first steps to working on information gathering, strategizing and coming up with a plan for our MLS issues.

We would love to have the opportunity in Chicago to share with other states. Please let us know what other information you will need. If selected we will work on details, PP and a full presentation.
