The Mortgage Market

During the first quarter of the year, housing affordability improved as mortgage rates fell below 7%. Steady interest rates from the Federal Reserve helped mortgage rates to ease in the first three months of the year. Nevertheless, even with this decrease, mortgage rates continued to be higher than a year ago. According to the mortgage provider Freddie Mac, the 30-year fixed mortgage rate rose to 6.75% in the first quarter from 6.36% a year earlier.

With lower interest rates on the horizon, mortgage rates are expected to ease later this year, thereby enhancing affordability for potential homebuyers. NAR forecasts the 30-year fixed mortgage rate to average 6.5% at the last quarter of the year.
